

Career Readiness Community of Practice

(formerly the ACP Community of Practice)

2021-22 Theme:
Creating a Culture of Career Readiness

In this year's virtual Career Readiness Community of Practice* we will dive more deeply into creating a **CULTURE** of career readiness for your school district. Each month we'll focus on developing a career readiness culture from a different angle. Participate only during the months that feature the topics you need! Here's what you can expect every month:

- Expertise with leaders or peers who will share their experiences and strategies
- Breakout room discussion where you can further explore the topic with other school districts and brainstorm challenges together

**All sessions will be recorded so you can participate synchronously or asynchronously. Breakout rooms only available for live participants.*

Calendar and registration links on next page.

Give students what they need for success – instruction that puts them on a path for career readiness!

- When students choose courses that align to their career interests, their **sense of belonging and engagement** in learning increases.
- Career exploration helps students find the **relevance** in their classes and increases **academic motivation**. These are **ESSENTIAL** when learning takes place remotely.
- Students have access to the **guidance and support** they need when they need it. We must make sure **ALL** students have a plan for success after high school.
- Students are **better equipped to succeed**, whether job opportunities are plentiful or become more scarce.
